

It's all about integration. Natural gas is one of many fuels that today's energy marketers offer. And Kraft Fuels' dispensers are good team players — integrating with existing operational systems, and providing the same easy customer service as gasoline dispensers.

Special Features of the CG-2000:

- High hose or low hose models available
- Single or dual hose configurations, with side or lane-mounted nozzle boots
- Available compressor monitoring (pressure and temperature) for up to four compressor stages
- Electronic cascade discharge selection control system (bank sequencing) integrated with register
- Electronic cascade filling control systems with compressor on/off control
- Integrated pressure and temperature corrected overfill control system
- Electronic data interface to card control systems
- High standard flow rate allows filling of most vehicles in under five minutes. Optional super high flow rates of up to 70 lbs per minute available
- Electronically controlled valves
- Heavy duty stainless steel tubing
- Dispenser wiring and junction box intrinsically safe
- Meter accuracy $\pm 0.2\%$ of rate, factory calibrated and tested
- Meter in hermetically sealed, stainless steel housing
- Cabinet built with heavy gauge, high quality stainless steel (type 304)
- Custom paint available in your corporate colours
- Built to national and international standards
